The **TAKISAWA TT-500GD** supports 5" chuck, which is minimum in parallel twin-spindle CNC lathe TT series. A twin gantry provided as standard is optimum for workpieces with short machining tact time, and the loading time is accelerated to 2.5 seconds. So, the non-cutting time is further reduced.

The high accuracy comb type tool slide is equipped. Non-cutting time can be reduced compared with the turret type. Five tools can be mounted, sufficient for small parts machining.
